

Biosphere 2

10 summer weeks of
Research & Training

Applications due no later than early March!

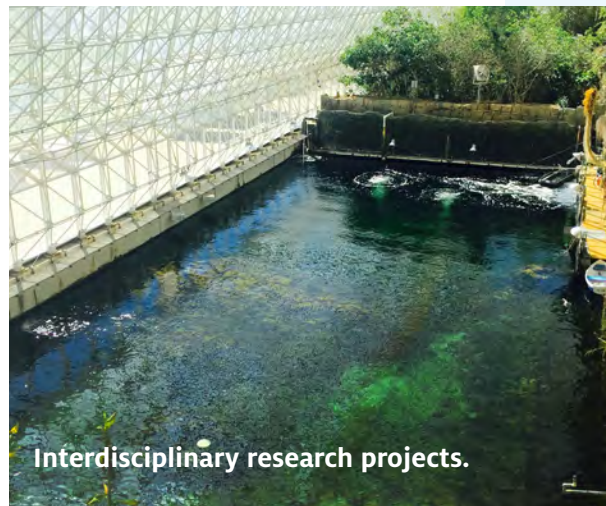

**Research Experiences
for Undergraduates**

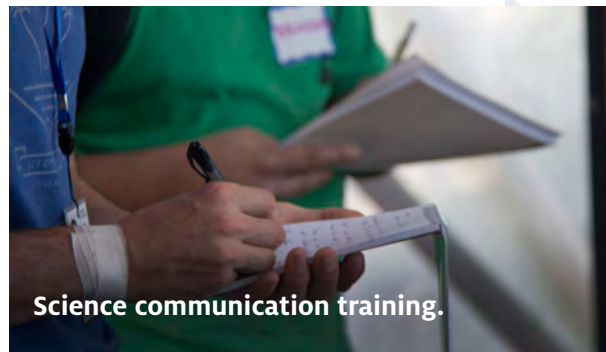

Life-changing Experience

Partner with UA scientists at
Biosphere 2, on the UA campus,
and at surrounding field sites.

Interdisciplinary research projects.

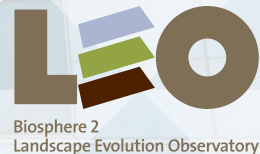

Science communication training.

Research Context

Join top researchers working
together at the interface of
multiple disciplines.

Tackling grand challenges
facing Earth and the
environment.

Ecology, biology, hydrology,
geology, geochemistry, soil
& atmospheric sciences.

What you need to know

Biosphere Research

Are you energetic,
curious & self-motivated?
– apply now!

We encourage applicants who are from underrepresented groups in STEM fields.

Apply by visiting

Biosphere2.org/education/research-experiences-for-undergraduates

Eligibility

Most successful applicants have

- 3.0 or greater GPA
- Relevant major or experience
- Completed at least a year of college prior to summer and have at least 1 year left after

Must be US citizen or permanent resident

Benefits

- 10-week residential research program
- Housing & food allowance
- \$5,000 stipend & travel support
- National meeting research presentation option

EXPLORE linkages between terrestrial, atmospheric, and aquatic systems.

EXAMINE intersection between biotic and abiotic worlds. @B2Science

TEST hypotheses about climate impacts on ecosystem processes.

CONNECT large scale, controlled research with the real world.

UNDERSTAND nexus of water, energy, and food. #FEWNexus
